Contact
Desertec Industrial Initiative (Dii) was launched in 2009 as a ‘not-for-profit’ entity in Germany for exploring the potential of renewables in the desert areas of Northern Africa and the Middle East, improving market conditions and examining the synergies to be captured through connecting the European and MENA power markets.

Dii Vision
Increased competitiveness of renewables shall swiftly lead to economic growth and secure near 100% renewable based power supply without emission or waste.

Our Mission: No Emissions!
Towards a fully emission free power supply in MENA, Encourage and support the deployment of utility-scale renewable energy projects and integrating them in the expanding interconnected power systems for greater local and regional benefits.

Dii Strategy
Connecting the international industry active in the MENA region with authorities and institutions. Focus on practical country specific issues of renewable energy projects and grid integration in the region and interconnections across countries leading to tangible and profitable projects and other benefits to the market.
Introduction

Dii Partners

Key Promoters

ACWA POWER  
innoogy  
STATE GRID CORPORATION OF CHINA

Associated Partners

ABB  ACCESS  alfanar  Al.Gihaz  AMANA  EuropaGrid  First Solar  GE  KRINNER  
MAURISOLARE  mEI  NAVIGANT  NOOR  BELECTRIC  cobra  ENARA ENERGY  ENERRAY  
Roland Berger  SIEMENS  STERLING & WILSON  SUNTECH  TSK  thyssenkrupp  WorleyParsons
Why Toolkit?

- In the ever-evolving energy markets, the power of information and in particular know-how, innovation, & collaboration, are key success factors.

- So What Is The Bottom Line?

- Use Top Down Analysis

- Q&A To Establish Workflow!

Objective: Accelerate RE Implementation

Bottom Line
Why Toolkit?

**Q:** What accelerates RE implementation?

**A:** Creating RE project opportunities.

**Q:** Who creates RE opportunities?

**A:** By connecting RE talent to drive innovation.

**Q:** What is the basis RE talent?

**A:** Establishing RE Knowledge Base. This is the bottom line! A solid foundation!
Why Toolkit?

PROCESS FLOW TO MEET OBJECTIVE:

- **Establishing**: RE Knowledge Base
- **Connecting**: Talent to Drive RE Innovation
- **Creating**: RE Project Opportunities
- **Accelerating**: RE Implementation

The Dii Toolkit “Establishes RE Knowledge Base” thus enabling talent connection, opportunity creation, & therefore renewable energy implementation acceleration.

Dii Toolkit Initiative sets a solid foundation for achieving the goal of energy independence via renewable energy, therefore accomplishing Dii Objectives.
Dii's "Toolkit for Renewable Energy Grid Integration, Project Development & Industry Localization" is derived from Dii's partners as well as Renewable Energy (RE) industry expert professionals know-how, experience, & best practices.

The objective of the Dii's Toolkit is to provide RE industry stakeholders, both private and public, with access to state-of-the-art measures & techniques (tools) which enable accelerated and smooth integration of large amounts of renewable energy into existing power grids & ensure tangible and durable benefits to the region.

Dii Toolkit scope of work includes:

- Tools & checklist for bankability of RE projects, system requirements for RE grid integration, operators’ technical capability to manage high levels of variable RE generation, local industry & job creation & retention factors, business transparency factors.

- Practical tips on project development, public and private procurement and localization, thus assuring: best value for money, industry involvement, job creation, sound financing, transparency & build of trust amongst stakeholders.

- Planning for gradual increase of RE generation at local, national, regional and international scale.

- Country case studies & sharing of know-how & expertise.

- The Toolkit database will be available at Dii’s website platform, exclusively for Dii’s partners & network members.
Toolkit Approach

- Dii Toolkit Approach to Creating Value and Knowledge Base
- WHAT TO DO vs. HOW TO DO

WHAT TO DO ?  HOW TO DO ?
Toolkit Approach

WHAT TO ?

Objective: Trip from A to B
