3rd Meeting of the MENA Hydrogen Alliance

Mr. Mohamed Ghazali
Secretary General
Ministry of Energy, Mines and the Environment

Wednesday May 20, 2020

The Kingdom of Morocco, widely qualified to play a key role

01

Green hydrogen is a technological solution to decarbonize our industry, especially for the production of fertilizers.

Significant logistical infrastructure and an industrial fabric the large-scale deployment of green hydrogen.

02

03

Deployment of large renewable energy projects with significant potential for solar and wind power.

Morocco is widely qualified to become a key player in the development of green hydrogen, due to its geographic location, its energy interconnections and its exceptional renewable resources.

04

Main actions carried out by the Kingdom of Morocco
